EXAMINER

ARAQUE JR, GERARDO

ART UNIT

PAPER NUMBER

3629

NOTIFICATION DATE

DELIVERY MODE

10/19/2007

ELECTRONIC

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

mailroom@bskb.com

Office Action Summary	Application No. 09/995,652	Applicant(s) KOJIMA ET AL.	
	Examiner Gerardo Araque Jr.	Art Unit 3629	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10 August 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-14 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-14 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Specification

1. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. **Claim 8** is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. In regards to **claim 8**, the applicant discloses in line 2 of the claim "...portable terminal relays commodity information to an outside at the same time...." However, the Examiner is uncertain as to what "an outside" is in reference to. That is to say, an outside computer, source, person, store, etc?

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. **Claim 14** is rejected under 35 U.S.C. 102(b) as being anticipated by **Trotta, Jr. (US Patent 5,595,264)**.

7. In regards to **claim 14**, **Trotta** discloses a portable terminal comprising:
- tag reader for reading via radio waves commodity information written onto a wireless tag located on a sample commodity remote from a checkout area (**Fig. 4 #23**);
 - storage for accumulating and storing commodity information that has been read by the tag reader (**Fig. 4 #27**);
 - wireless communication device for transmitting commodity information to an information-processing apparatus via radio waves at the same time that the commodity information is stored in the storage (**Fig. 4 #40**); and
 - display for displaying the commodity information that has been read out (**Fig. 4 #22**).

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.
9. **Claims 1 - 13** are rejected under 35 U.S.C. 103(a) as being unpatentable over **Trotta, Jr. (US Patent 5,595,264)** in view of **Garver (US Patent 7,114,656 B1)**.
10. In regards to **claims 1 – 3**, **Trotta** discloses a merchandise retail management method comprising the steps of:
- putting a tag on display together with a sample commodity in a display area, commodity information including an identification code of the commodity, being allowed to be read from the tag (**Col. 2 Lines 55 – 56**);

lending out a portable terminal capable of reading the tag to a customer entering the display area (**Col. 3 Lines 56 – 57**);

reading the commodity information from the tag, which is put on display together with the corresponding sample commodity, with the portable terminal when the customer indicates an interest in purchasing the commodity (**Col. 5 Lines 1 – 29**);

storing the corresponding commodity information in the portable terminal and relaying it to an information-processing apparatus for merchandise management and sales management (**Col. 1 Lines 56 – 59; Col. 5 Lines 55 – 57**);

comparing at the information-processing apparatus the commodity information which has already been relayed to the information-processing apparatus, with commodity information which is sent from the portable terminal to a POS apparatus at a sales counter and is then entered into the information-processing apparatus (**Col. 4 Lines 30 – 40**);

the customer returning the portable terminal when leaving (**Col. 6 Lines 2 – 4**);
and

handing over of the commodity to the customer after the commodity to be sold has been prepared in accordance with the comparison result of commodity information at the information-processing apparatus (**Col. 6 Lines 8 – 12**).

However, **Trotta** fails to teach putting a tag on display together with a sample commodity in a display area, commodity information including an identification code of the commodity, being allowed to be **written** to the tag.

Garver teaches a method and system similar to **Trotta** in that a portable terminal is provided to a customer in order to cut total shopping time by reducing the amount of time spend at checkout. **Garver** further discloses that it is also old and well known that various types of indicia, such as RFID tags, can be used to read and write the commodity information on the commodity (**Col. 3 Lines 18 – 20; Col. 5 Line 40**). As a result, providing an RFID tag would allow for the RFID tag to be used multiple times because of their characteristic of having its data be rewritten and that they do not require an unobstructed line of sight between the tag and the reader (**additional information can be found at http://whatis.techtarget.com/definition/0,,sid9_gci1038008,00.html**).

Therefore, it would have been obvious to one having ordinary skill in the art at the time of the invention in view of the teaching of **Garver** to modify **Trotta** to have sample commodity with the corresponding RFID since they can be rewritten with new commodity information in order to reuse the tags and avoid purchasing new tags when replacing old commodities with new commodities or for a price change, as well as the additional benefit that an RFID tag does not require an unobstructed line of sight between the tag and the reader

11. In regards to **claim 4**, although **the combination of Trotta and Garver** fails to disclose further comprising a rewriting apparatus for rewriting the commodity information on the wireless tag the Examiner asserts that it would have been obvious to one having ordinary skill in the art at the time of the invention that a rewriting apparatus to be obviously included since an RFID tag requires some type of read/write device so

Art Unit: 3629

that the information can be stored on the RFID tag (**additional information can be found at http://whatis.techtarget.com/definition/0,,sid9_gci1038008,00.html**).

12. In regards to **claims 5 – 6**, **Trotta** discloses wherein the portable terminal includes:

input means with which the customer commands an arithmetic process relating to stored commodity information (**Col. 5 Lines 1 – 29**); and

arithmetic means for conducting arithmetic processing according to the command to the input means (**obviously included**).

13. In regards to **claim 7**, **Trotta** discloses wherein the portable terminal includes:

input means with which the customer designates stored commodity information (**Col. 6 Lines 33 – 35**); and

display means for displaying commodity information in accordance with the designation made to the input means (**Col. 4 Line 21**).

14. In regards to **claim 8**, **Trotta** discloses wherein the portable terminal relays

commodity information to an outside at the same time that the portable terminal reads out the commodity information from the wireless tag (**Col. 3 Lines 8 – 11**).

15. In regards to **claim 9**, **Trotta** discloses wherein the information-processing apparatus includes:

wireless communication means for wireless communication with the portable terminal held by a customer checking out (**Col. 3 Lines 8 – 11; Col. 4 Lines 15 – 20**); and

customer specification means for specifying customers by wireless communication via the wireless communication means (**Col. 3 Lines 8 – 11; Col. 4 Lines 38 – 40**).

16. In regards to **claim 10**, **Trotta** discloses wherein the information-processing apparatus further includes:

commodity information readout means for reading out the commodity information stored in the portable terminal through wireless communication with the portable terminal via the wireless communication means (**Col. 4 Lines 38 – 40**);

display means for displaying a list of commodity information that has been read out by the commodity information readout means (**obviously included**);

correction input means for receiving corrected input from customers who have viewed the list displayed by the display means (**Col. 6 Lines 33 – 50**); and

commodity correction means for correcting commodity information in accordance with the corrected input when the corrected input means receives corrected input (**Col. 6 Lines 33 – 50**).

17. In regards to **claim 11**, **Trotta** discloses wherein the information-processing apparatus carries out revision and addition of information to the list through wireless communication with the portable terminal via the wireless communication means (**Col. 5 Lines 48 – 65**).

18. In regards to **claims 12 – 13**, **Trotta** discloses wherein the information-processing apparatus is further provided with payment processing means capable of processing payment for sales, displayed by the display means (**Col. 6 Lines 5 – 12**).

Response to Arguments

19. Applicant's arguments with respect to **claims 1 – 14** have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

20. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure can be found in the PTO-892 Notice of References Cited.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gerardo Araque Jr. whose telephone number is (571)272-3747. The examiner can normally be reached on Monday - Friday 8:30AM - 4:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Weiss can be reached on (571) 272-6812. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
